# T450 Compact Track Loader

The Bobcat® M3-Series T450 is the smallest compact track loader in the Bobcat model lineup, making it a great machine for jobs in small, confined spaces.

- Ultra-efficient fuel system
- Radius-lift-path offers leading performance
- Unmatched power to push through tough jobs

**Pay as low as 0% financing for up to 36 months\* or choose rebates up to \$2,000 USD\*/\$2,600 CAD\* on Bobcat T450 compact track loaders.**

## T450 Overview

- The Bobcat® M3-Series T450 compact track loader delivers the maneuverability your work requires with all the power you need to haul, lift, dig and operate attachments – and quickly move across the worksite.
- The 55-hp Bobcat engine meets Tier 4 emissions standards without a diesel particulate filter (DPF), reducing downtime for regeneration and long-term DPF maintenance costs.
- You can count on the T450's powerful hydraulic performance, leading maneuverability and fast cycle times to get the tough jobs done in less time.
- Premium comfort features include the optional pressurized cab, sound dampening and ample headroom and legroom.

# T450 Features & Benefits

[Collapse All](#)

## Performance 8

### Standard Control Systems

With Bobcat Standard Controls, operators control the drive functions with dual steering levers and manage the loader lift and tilt with dual foot pedals.

### Selectable Joystick Control System

With Bobcat® Selectable Joystick Controls (SJC), available on most loader models, the power is in your hands. They're the most advanced joysticks on the market, engineered and built with technology and features to help you run your machine and attachments more efficiently than ever. No other joysticks in the industry come close to delivering this level of customization and control you'll find with SJC. Our system lets you control your loader and attachments easily and comfortably. They're loaded with many Bobcat-exclusive features.

[Learn More](#)

### Deluxe Instrumentation

Deluxe Instrumentation brings upgraded communication, monitoring, productivity and control to your Bobcat® skid-steer loader or compact track loader. It monitors key loader functions, communicates alerts and provides additional attachment information to track usage.

### Remote Control

All loaders that are equipped with Selectable Joystick Control (SJC) can be operated by a remote-control system, so you can operate the machine without an operator in the cab. The remote control is completely portable. If you have multiple machines, you can quickly remove the remote from one machine and attach it to another in minutes.

### Durable Undercarriage System

You won't find a tougher track system on the market. Every component is engineered for lasting durability, including steel imbed tracks, forged steel idlers and solid-mounted drive motors and hydraulic hoses. The undercarriage system for Bobcat® loaders also delivers a better-quality ride and simple maintenance.

[Learn More](#)

### 2-Speed Travel

The 2-Speed travel option boosts your top travel speed. Reduce your travel time across jobsites, limit the need to load and unload your machine on a trailer and shorten your long-haul tasks.

### Quicker Turning

When not carrying a load, Bobcat skid-steer loaders deliver balanced, easy turning for ideal performance. Our skid-steer loaders offer effective turning and skidding; reduced fuel consumption and power requirements; increased drive train and tire life; and less wear and tear.

### Smart Cooling

Bobcat loaders feature the exclusive SmartFAN that only turns as fast as needed. The patented design cools more efficiently, while the radiator and hydraulic oil cooler are protected from jobsite hazards. Additionally, Bobcat offers an optional automatic reversing fan which clears debris from the radiator screen while you're working in dirty environments.

## Uptime Protection <sup>5</sup>

### Protected Loader Components

Jobsite hazards are everywhere and when your machine is out of operation for repairs, you lose time and money. With Bobcat skid-steer loaders and compact track loaders, you're ready for nearly anything that you'll encounter. Each component is designed for reliable protection. That means peace of mind, no matter the conditions of your jobsite.

### Protection Technologies

Every skid-steer and compact track loader is engineered with multiple protection technologies. Working together, they protect your machine and decrease the risk of failure. For you, that means better reliability and the confidence to do your work.

### Cold Weather Engine Protection

Bobcat diesel engines are engineered to guard against the damaging effects of extremely cold weather. They prevent premature wear by automatically increasing the idle speed (rpm) to warm up oil and set a maximum operating speed (rpm) to prevent premature component wear or failure. Depending on the engine oil temperature, the protection may activate for several seconds to a few minutes.

### Simple Machine Tie-downs

Quickly secure your skid-steer loader or compact track loader without searching for hard-to-reach tie-downs. The tie-downs are easy to locate and use.

### Non-DPF Engine

The biggest advantage of our Tier 4 solution is simplicity. Bobcat engines meet Tier 4 regulations without a diesel particulate filter (DPF). This reduces downtime that occurs with DPF regeneration and long-term DPF maintenance costs. That allows operators to focus on working.

## Comfort 7

### Leading Visibility

Bobcat skid-steer loader and compact track loader cabs are designed for all-around visibility. As you grade next to a building or load the machine on a trailer, you'll gain optimal sight lines for easier operation. View the bucket corners from your seat and easily see the cutting edge. Your tracks or tires are visible without raising the loader arms. A large top window gives you visibility while dumping material into a high-sided truck.

### Premium Comfort

When you step in the cab of a Bobcat loader, you'll immediately notice the attention given to operator comfort. A long list of features is included in the cab with a large entry for easy access and more interior space than competitors. Once inside, cab pressurization and an adjustable seat are just the beginning.

[Learn More](#)

### Pressurized Enclosed Cab

Bobcat loaders with enclosed cabs feature a best-in-class, pressurizing front door seal that repels dust and keeps clean, heated or air-conditioned air inside, for maximum comfort.

### Adjustable Seat

Adjustable seats on our skid-steer loaders and compact track loaders set new standards for comfort. No matter your height, it's easy to find a comfortable operating position with multiple adjustment points. With the optional air ride seat, you'll experience maximum suspension comfort. It adjusts to your weight, helping you smooth out the bumps on your jobsite.

### Maximum Headroom and Legroom

Bobcat skid-steer loaders and compact track loaders are engineered with large swing-open doors, and a lowered door threshold, which provide ample headroom for exit and entry. Inside, even tall operators will be comfortable with plenty of headroom. Additionally, the swing-open door doesn't take up cab space and can be removed without tools.

### Sound Dampening

If you work on a busy jobsite, you know that noise can be a daily frustration. Bobcat® loaders include many sound dampening features that keep your cab quieter.

### Lift Cylinder Cushioning

You'll experience smoother arm movements with lift cylinder cushioning. It eliminates the need for manual arm slowing and reduces harsh movements. For you, that means less vibration, quieter operation and increased comfort.

## Serviceability <sup>4</sup>

### Full-Access Serviceability

No other loader matches the serviceability of Bobcat skid-steer loaders and compact track loaders. Our large, swing-open tailgate provides convenient access to routine maintenance points. Unlike other brands, there are no radiators to move, lift arms to raise or lift-arm support devices to install in order to service the machine. Spend your time completing maintenance work rather than struggling to gain access.

### Easy Grease Point Access

Maintenance is easier and faster with easy-to-access grease zerk locations on critical pivot points. With Bobcat compact loaders, there's no need to lay on the ground or stand on tracks or tires to access grease points.

### Transverse Engine & Belt Drive

Bobcat loaders offer one-sided serviceability thanks to the exclusive belt-drive system. This durable technology with a multi-groove Kevlar™ belt allows your loader engine to run slower for reduced noise and increased durability. It's also more efficient with an optimized engine-to-pump package.

### Hydraulic Oil Site Gauge

Check your hydraulic oil level quickly and easily as you walk by your machine. Keep an eye on hydraulic oil levels and simplify your daily checks.

### Versatility <sup>3</sup>

#### Attachment Versatility

Our attachments help you do much more than dig. Bobcat offers attachment versatility across carriers combined with unbeatable attachment support from the Bobcat dealer network.

#### Bob-Tach Attachment System

Change attachments quickly and easily using the time-tested standard Bob-Tach mounting system included with every loader, or upgrade to the Power Bob-Tach system - available on select models - for swapping non-hydraulic attachments without leaving your seat.

### Power Bob-Tach System

Quickly swap non-hydraulic attachments without leaving your seat using the Bob-Tach attachment mounting system available on select models. And for hydraulic attachments, all you need to do is hook up the hoses after you have secured the attachment. Using the Power Bob-Tach mounting system is fast and easy. After lining up your attachment, simply press a switch inside the cab to engage the wedges into the attachment. They lock into place and keep the attachment secure.
